

BOOK SEVEN

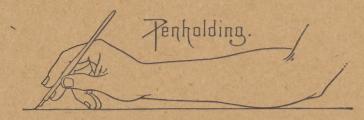

COPYRIGHT, 1906, BY

AMIERICAN BOOK COMIPANY NEWYORK: CINCINNATI: CHICAGO THE TEACHERS using these lessons will in general, no doubt, be more or less familiar with the best way to sit at the desk and hold the pen in writing; and they will understand how important it is that a good light, healthful-

ness, and convenience for the work to be done should be fully provided for in whatever position is observed.

The light should be ample, but not glaring, and should come preferably from above over the pupil's left shoulder.

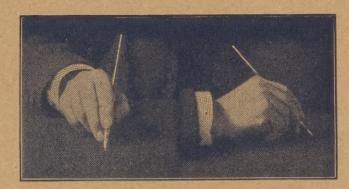

SITTING AT DESK. The Front Position, being the best when there is room and other conditions permit, is the one here recom-

mended and described. Let the pupil sit squarely before the desk, and easily, not rigidly, erect, inclining a little forward from the hips, not bowing the back nor hollowing the chest, but preserving an attitude favorable to full normal respiration. Though near the desk, the body should not lean against it.

The feet must not be drawn back, but should be placed forward level upon the floor. The forearms are to rest in front about equally upon the desk. The body leans a little on and is steadied by the left arm, with the left hand resting upon the book to keep it in place and adjust it when required, leaving the right arm and hand free to handle the pen, the right forearm resting easily on the large muscle near the elbow.

HAND AND PEN. The right way to hold the pen is shown clearly in the cuts. As for

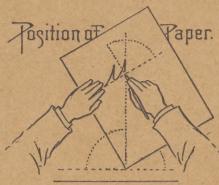

the hand, let it turn over to left until the pen points about to right shoulder, with wrist free from desk. Thus it can move freely across the paper, gliding on nails of third and fourth fingers, bent under for the purpose.

THE PAPER. Turn the book or paper obliquely (see third cut) until its top is about a third of a right angle to left of a straight front position; in other words, turn the book or paper until the pen is about at right angles with the ruled lines and can readily follow them when swept freely across the page.

MOVEMENT. The action of the first and second fingers and thumb, which is called the *finger movement*, is the first writing movement to develop in the child; and coming naturally to him, it will be used in his first efforts in writing in acquiring the forms of the letters.

This is, however, a comparatively weak and inefficient movement when used alone, and the pupil should gradually be led, by proper instruction and exercises, to combine with it the stronger action of the forearm, termed the

forearm movement, which, sweeping rightward, turning on its rest near the elbow, carries the hand easily forward from stroke to stroke and letter to letter,

helping to make as well as join them, while the fingers add their finer shaping power to give finish to the forms. This united action of the forearm and fingers is known as the *combined movement*, and is generally considered the ideal movement for the purpose of business.

a good name is rather to be chosen than great riches, and loving favor rather than fine gold. (I good name is rather to be chosen than great riches, and bring fauor rather than fine gold agood name is rather to be chosen Chan great riches, and lowing favor rather than fine gold. It good name is rather to be chosen than great riches and loung. favor rather than fine gold. I good name is rather to be chos en and lowing fairer rather than fine gold a good name is rather to be chosen than great riches and living favor rather than fine gold.

Our thoughts ought to be such that we would be willing to have others know them at any moment. Our Thoughis ought to be such that we would be willing to have others know then at any moment. Our Choughts crught to be such that we would be willing to have others know them at any moment. Our thoughts ought to be such that we would be willing to have others know them at any moment. Our thoughts ought to fe such that we would be willing for others to them at any moment. Our thoughts ought to be such that we would be willing to have. others know them at any moment.

Those always have good company who are careful to entertain only good and noble thoughts.
